

JobsNow Green Weatherization Training

Green Weatherization Training includes the following courses:

Building Principles

This class will provide students with an understanding of building science principals. Topics covered will include infiltration theory, diagnostic techniques, and hands on experience auditing a complex house.

Weatherization & Tactics

This class will cover approaches of whole house weatherization and instillation techniques. Students will receive hands on training that will focus on areas of health and safety on the jobsite, air sealing, insulation placement, sealing ductwork, and using blower door guided air sealing techniques to weatherize a dwelling.

Mobile Home Inspection & Weatherization

This class will prepare students to complete energy audits on mobile homes. Students will receive training on installing materials and the specific problems and concerns that are encountered with Mobile Homes.
